

Smart Mirror Marlo

Technical innovation meets classical design. Discover the new way of digital communication by introducing Smart Mirror MARLO to your staff and guests.

SMART MIRROR FOR THE HOSPITALITY SECTOR

Smart Mirror *Marlo*, which was specially developed with value-added attributes for the hospitality sector. *Marlo* offers a new, revolutionary platform for digital communication with the guest in all areas of hotels and restaurants - starting with the welcome message for the guest by the digital personal butler in the interactive mirror. Sensitive to movement, the smart host wakes up when entering the suite, invites to enjoy the happy hour in the bar or other hotel specials and reveals details such as opening hours and today's culinary delights. *Marlo* also suggests spa treatments, provides inspiration for excursions and local events, and books sightseeing packages, if desired. The intelligent takeover of the entire room control system is easy for *Marlo*: thanks to integrated voice control, the Smart Mirror delegates lights, roller blinds, TV, music and more - even very conveniently from the bed. In this way, *Marlo* supports communication between guest and host in a clever and charming manner and offers a wide range of options for responding to requests even more effectively and increasing customer loyalty.

Individual instead of commonplace: *Marlo* will be custom designed in cooperation with the architect and individually configured by Mues-Tec's IT staff.

MUES-TEC

INSTALLATION SPECIFICATIONS

Marlo comes ready to install and mount on the wall. Mues-Tec offers a wide range of installation methods, recessed and surface mount. Exact instructions will be shared once final drawings are approved. Drawings will also show where to connect power cord and Cat 5/6 cable.

Connect *Marlo* to an unswitched 120/240V recessed electrical outlet. Should you opt for an IP rated version, you will receive a 12/24 Volt DC power supply you will place into the wall.

Connect *Marlo* to the Ethernet, either through LAN or Wi-Fi.

BASIC OPERATIONS & CARE

Smart Mirror *Marlo* is operational once connected to your network and receiving power.

Whether it is self-sufficient or with maintenance from Mues-Tec depends on your package selected.

On sight training is available upon request. Installation by Mues-Tec depends on your country.

Daily cleaning should be done with water or common glass cleaners. *Marlo* remains on during cleaning.
